\* You could lose money by investing in the Fund. Although the Fund seeks to preserve the value of your investment at \$1.00 per share, it cannot guarantee it will do so. An investment in the Fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The Fund's sponsor has no legal obligation to provide financial support to the Fund, and you should not expect that the sponsor will provide financial support to the Fund at any time.

<sup>1</sup> Gross/Net Expense Ratio: Net expense ratios take into consideration fund expenses minus fee waivers and/or portfolio reimbursements. Without fee waivers and/or portfolio reimbursements returns would be lower. The advisor makes no guarantee that fees will continue to be waived following a period of one year from the Prospectus date. Returns are calculated using Net Expense Ratios.

<sup>2</sup> Returns show the performance and fees of the underlying fund, deductions for the mortality and expense risk charge (deducted daily as a percentage of daily Subaccount net assets), and administrative charge (deducted daily as a percentage of daily Subaccount net assets). Returns do not reflect any optional benefits selected or contingent deferred sales charge (surrender charge) and would be significantly lower if included. Returns shown represent past performance and do not guarantee future results. Returns and values will fluctuate. The contract value may be worth more or less than the original investment and the actual returns may be lower or higher than the returns shown. For performance to the most recent month-end, contact Protective at 800-456-6330 or visit myaccount.protective.com.

<sup>3</sup> The returns are calculated from the date the portfolio was first available, shown in the Portfolio Inception Date column and are calculated over the time period shown, regardless of whether the fund was available as an investment option under the contract during that period. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost and current performance may be lower or higher than the performance data quoted. Returns predating inclusion in the product are hypothetical. The returns are from the Portfolio Inception Date through the end of the prior quarter.

## Morningstar and performance information

Quarterly and performance information is provided by Morningstar and includes both current and historical data to assist you in developing a diversified investment strategy. The investment options are organized by Protective's investment style category.

### Total return

Expressed in percentage terms, Morningstar's calculation of total return is determined each month by taking the change in monthly net asset value, reinvesting all income and capital gains distributions during that month and dividing by the starting NAV. Reinvestments are made using the actual reinvestment NAV, and daily payoffs are reinvested monthly. Unless otherwise noted, Morningstar does not adjust total returns for sales charges (such as front-end loads, deferred loads and redemption fees), preferring to give a clearer picture of a fund's performance. The total returns do account for management, administrative, 12b-1 fees and other costs taken out of fund assets. Total returns for periods longer than one year are expressed in terms of compounded average annual returns (also known as geometric total returns), affording a more meaningful picture of fund performance than non-annualized figures. The Money Market return is based on a 7-day yield.

### Annual return

Annual returns are the total returns calculated on a calendar-year basis.
