One size doesn't fit all when it comes to underwriting.

PLUS is designed to underwrite Protective life insurance applicants using a faster and less invasive process. Using advanced analytics, our flexible solution can streamline the experience for eligible applicants based on their individual circumstances.

Applicants who apply for fully-underwritten Term, Universal Life and Variable Universal Life products may qualify for PLUS. Contact your Protective representative for a complete list of PLUS-eligible products.

For Financial Professional Use Only. Not for Use With Consumers.

Key benefits of PLUS:

-  Fluids and APSs may not be required
-  Application Part II can be completed by phone with a Protective employee during business hours or online 24/7.
-  Application cycle time reduced by 14 days
-  All cases facilitated via Protective's automated underwriting platform to optimize speed to issue

How our process works:

- To process the application for PLUS consideration, a completed Protective application Part II is required. Applicants can complete this online or elect to complete the interview over the phone.
- With either path, PLUS gathers the required data. Along with the application disclosures, PLUS uses the data to determine the underwriting requirements and the best available class for the applicant.
- Application package sent out for signature.
- At the end of the application process, you can expect your applicant to follow one of these two paths:

Accelerated underwriting: The need for an exam and labs is eliminated, and the policy is ready to be issued.

Traditional underwriting: Exam, fluids, labs and/or medical records are required to ensure accurate underwriting.

Some applicants may appear to be eligible for an accelerated underwriting offer, but still will be required to complete the exam and labs. The need for exam and labs could be from the underwriting data gathered (for example, prescription drug reports), a disclosure by the applicant, or a combination of factors. Even if your applicant does not get an accelerated underwriting offer, they could still qualify for the best class through exam and labs underwriting.

Accelerated underwriting cases will be monitored post-issue to confirm the disclosures provided by the applicant. Information gathered via accelerated underwriting cases may be reviewed and addressed with your applicant if we discover any material differences.

The checklist below will help you determine if your applicant may qualify for PLUS, possibly eliminating the need for fluids and APSs.
