Overloan protection endorsement	Following the final supplemental retirement income disbursement from the policy as part of a LIRP strategy, the Overloan Protection Endorsement will prevent the policy from lapsing and the death benefit will be at least \$10,000 as long as certain conditions are met. There is a one-time charge when invoked.
Terminal illness accelerated death benefit endorsement	This can accelerate up to 60% of the policy's death benefit or \$1 million, whichever is less, if the insured has a qualifying terminal illness. A lien equal to the accelerated payment is established against the policy and accumulates interest, resulting in a reduction in the amount of the death benefit and the amount available for loans and withdrawals.

Lapse protection

Grace period

If you are unable to pay your premium on time, your policy will remain in-force (valid) for a grace period of 61 days.

However, if the premium payment is not received by the end of the grace period, the policy will lapse.

Lapse protection

Lapse protection ensures the policy and the death benefit will remain in effect, regardless of the surrender value, but does not guarantee any cash or surrender value. Loans, withdrawals, and other policy and premium changes may cause the protection to end. Failure to make premium payments as planned may cause the policy to lose lapse protection.

The lapse protection period is 10 years, and the minimum monthly premium will vary by age, sex and issue age.

Refer to the policy and endorsements for complete terms, conditions and limitations.
